1. Inner courtyard with exposed micropiles
2. Demolition works in the aboveground levels
3. Excavation in stages in the underground levels with regular underpinnings

Project

In 3 buildings which are under monument protection, radio and TV studios, workplaces for print media and a hall for federal media conferences are being built. The underground floor is to be newly constructed with modern fittings, while in the upper floors, the existing structure will be respectfully completed.

Construction Period

2004–2006

Services

Main Contractor new building (underground levels), alteration/renovation (ground floor to attic level)
